DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I consists of those claims reciting heat releasing magnetic film, heat releasing magnetic coating film and/or heat releasing coating film comprising carbon black.

Species II consists of those claims reciting heat releasing magnetic film, heat releasing magnetic coating film and/or heat releasing coating films comprising titanium oxide.

Species III consists of those claims reciting magnetic coating film, heat releasing film, black heat releasing coating film and/or heat releasing coating film with the integrated emissivity satisfying $b \leq 0.9(a - 0.05)$ and $(a - 0.05)(b - 0.05) \geq 0.08$

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 7 - 8 and 14 - 15 correspond to species I; claims 9, 16, 18 - 19 correspond to species II; claims 10, 17, 20 - 21 correspond to species III.

The following claim(s) are generic: 1 - 6, 11 - 13.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The examiner has determined, *a posteriori*, that the species lack the same or corresponding special technical features based on the lack of novelty of the common inventive concepts as annotated in the international search report provided by applicant(s).

4. A telephone call was not made to counsel for the applicant to request an oral election to the above restriction requirement. Law firm representing applicant(s) has notified the examiner that they require written restriction requirements for foreign applicant(s).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
